ADMINISTRATIVE

Due to the national interest in this matter, an additional copy of this report is being furnished to the Bureau since other than ordinary dissemination may be necessary.

It is noted that this report reflects an extensive investigative period; however, this matter has received continuous and preferred investigative attention. It was not deemed practical to set forth certain investigative work conducted by other offices prior to this until certain particular facets concerning their investigation was completed.

In instant report information is set forth relative to a handwriting comparison made relative to a check submitted by the Mobile Office containing the names [REDACTED] and [REDACTED]. It was alleged that this individual was possibly identical with Subject JOHN WILLIAM ANGLIN. b7c

Bureau communication of May 17, 1963, which reflected the administrative data relative to this handwriting comparison, indicated that some differences were noted during the comparison of the writings on the check containing the names [REDACTED] and [REDACTED] as compared with the available handwriting of JOHN ANGLIN. This would indicate the possibility that ANGLIN may not have prepared any of the questioned writings. b7c

contact with them since that time and has kept up with their criminal activities through news accounts and from his family. b7c

[redacted] went on to say that his own family disapproves b7c b7D of the conduct of the ANGLIN boys, and he has not discussed their escape or attempted escape with the family and has heard no one say either "J. [redacted] said his four young children are not aware of b7c b7D the activities of the ANGLIN brothers since they could consider these men heroes in their apparent widespread criminal activities. He said that except for CLARENCE ANGLIN, whom he considered somewhat mentally unstable, none of the other ANGLIN brothers had been vicious, but rather seemed to feel the world owes them a living and they intend to have things without working for them.

About the only writings maintained in the Laboratory appear on the photocopies of check faces maintained in the National Fraudulent Check File and photocopies of portions of anonymous letters which are kept in the Anonymous Letter File. However, these samples are very limited and the comparison of the writings thereon with the writings on Q29 and Q30 would entail a great volume of work. Further, in view of the limited amount of writings on file, the possibility of making an identification is extremely remote. As a result, no comparisons, other than that mentioned in the attached report, were made. As indicated in the attached letter, representative photographs of Q29 and Q30 are being retained. In the event that a specific request is made in the future for an additional handwriting comparison.

It is noted that this report reflects an extensive investigative period; however, this matter has received continuous and preferred investigative attention. It was not deemed practical to set forth certain investigative work conducted by other offices prior to this until certain particular facets concerning their investigation was completed.

Omaha communication of July 2, 1963, reflected that [redacted] who requested his name be kept in the strictest of confidence, [redacted] reported the following on June 10, 1963:

b7c  
b7D

[redacted] He witnessed the slaying of two uniformed policemen outside the [redacted] This shooting took place shortly after 7:00 P.M. He claims JOHN WILLIAM ANGLIN was the person who killed the two patrolmen. ANGLIN in New Orleans was known as "Harry the Horse." Subject claims he was raised in [redacted]

He claims he was on the front porch stairs of his apartment Sunday night, at 9:30 P.M., June 9, 1963, he observed a car stop for a stop sign at [redacted] observed the driver and feels certain the driver was JOHN WILLIAM ANGLIN. ANGLIN was alone and driving a 1961 dark blue Mercury four-door sedan, bearing California license plates. There were two amber fog lights on the front of this car. He stated ANGLIN turned toward him and he observed ANGLIN had a band-aid on the left side of his face. [redacted] became frightened and returned to his apartment. He claims ANGLIN recognized him at the double slaying and also recognized him this Sunday night.

b7c

[redacted] continued to tell how frightened he is and when he completed his story said he "had to get a beer."

b7c, b7D

[redacted] south, [redacted] runs east and west. [redacted] runs north and apartment house is [redacted]

b7c  
b7D

The apartment house faces [redacted] from the sidewalk in front of this apartment you climb six stairs, walk west about 25 feet and climb six more stairs to reach the porch. To the immediate north of the porch stairs are bushes at least eight feet high.

b7c

b7c

On June 10, 1963, an investigation was conducted of this physical layout and when a car going east, stops at the [redacted] stop sign on [redacted] a person standing on the porch stairs can see only as high as the shoulders of a driver. On some of the porch stairs the view of the car and driver are obscured by the bushes. Also a driver of a car, stopping at this stop sign would have to bend his head down to the level of the steering wheel or lower to see these porch stairs. It is incredible that a person at night could recognize a driver of a car from the position where [redacted] said he was, let alone see a band-aid on the left side of the driver's cheek.

[redacted]

b7c  
b7D

[redacted] Sioux City, Iowa, Police Department, Sheriff [redacted] Sioux City and [redacted] South Sioux City, Nebraska, were advised JOHN ANGLIN may have been seen at Sioux City, Iowa, June 9, 1963, and a description of the car was furnished. This was done June 10, 1963.

[redacted]

[redacted] told [redacted] he had reported this information to the FBI this date and he, [redacted] was leaving town as he was afraid.

Still later the same day [redacted] telephoned the FBI Resident Agency at Sioux City and said he was leaving town within thirty minutes; that he was scared and did not care to leave a forwarding address. He said he would write any further information he learns but would not sign the letters.

[REDACTED]

New Orleans communication dated August 6, 1963, reflected the following information:

The following investigation was conducted by SA [REDACTED] at New Orleans, Louisiana, on July 18, 1963:

b7C

A review of the New Orleans FBI Office files concerning escapees reveals that JOHN ANGLIN was born in Georgia in either 1930 or 1931. ANGLIN's parents, brothers and sisters are living in Florida and California and ANGLIN was never arrested in New Orleans.

There is no indication, from a review of the interviews of the relatives of ANGLIN that any of them live in or near the New Orleans area. ANGLIN's background seems to indicate that he was raised in Florida due to the fact that he attended one year of high school there.

[REDACTED] advised that he cannot recall the slaying of two police officers during the 1957 or 1958 Mardi Gras season.

b7C  
b7D

[REDACTED] advised that neither he nor his staff recall any shooting of the police officers during the Mardi Gras season of either 1957 or 1958. He stated further that he has lived in the Irish Channel section of New Orleans all his life and does not recall anyone by the name of ANGLIN residing there.

The Tampa Times newspaper contained articles on June 13, 1963 regarding the ANGLIN subjects having been missing for over a year. Date July 8, 1963

1.

[redacted] was interviewed at the United States Penitentiary, Atlanta, Georgia, and questioned concerning any knowledge he may have concerning the whereabouts of subjects in this case, or information he may have that would be of assistance in locating them. [redacted] volunteered the following information:

He stated that [redacted] formerly of the United States Penitentiary, Alcatraz, worked in the clothing issue room and now claims that he furnished subjects with approximately 350 raincoats, which he took from clothing supplies, and that subjects used the raincoats to build a raft which they used in their escape, the building of which raft took some six to eight months. The raft was built so it would hold air and could be pumped up. He stated [redacted] claims to believe the subjects successfully made their escape, and that they are alive. He stated further that [redacted] is telling that the subjects, as part of their plan before escaping, stated they were going to leave debris at some point strewn about so that it would appear they had wrecked and drowned. According to the information given [redacted] subjects planned to start their escape from the back of the powerhouse building and carry the raft by hand to the beach and then travel to Angel Island and walk down the beach carrying the raft to a point where they could cross over to Susquelana. Then they had planned to pull one big robbery and "take off." [redacted] stated he knows that [redacted] is a pathological liar, who has no qualms about making up wild stories and that he [redacted] does not know just how much to believe of the foregoing information, but he was furnishing it as told to him. [redacted] further added he has been told that fragments brought in as part of the raft used by the subjects in their escape definitely were not parts of the raft used by subjects, as it was made of different material. [redacted] also volunteered information that [redacted] claims that [redacted] now confined at the United States Penitentiary, Atlanta, Georgia, and was an inmate at Alcatraz at the time subjects - escaped, gave to subject, MORRIS, an address to which subjects could go in Los Angeles, California, to hide out.

Relative to the lead for the San Francisco Office to identify a late model red convertible and to information as to the identity of the driver of this vehicle, it is noted that during the pertinent period the San Francisco Office considered all stolen vehicles in the Bay Area as a potential avenue of escape used by Subjects. They were in fact checked sufficiently close to the mainland in the area of Alcatraz Island to warrant *no* further inquiry. Accordingly, no further inquiries are being made in this regard.

It is pointed out that if the vehicle had been stolen *then*, same would necessarily have had to be re-registered due to the outdated license plates.

The following investigation was conducted by SA [REDACTED] at Ruskin, Fla. on the dates indicated:

[REDACTED]

[REDACTED] both advised that they have been long-time residents of the Ruskin area and both are acquainted with many of the ANGLINS' relatives. Both [REDACTED] and [REDACTED] further advised that they have not heard any information whatever concerning the ANGLINS' possible appearance in the Ruskin area.

On August 29, 1963, the following relatives and acquaintances were interviewed and all stated that they have received no information whatever regarding subjects', JOHN WILLIAM and CLARENCE ANGLIN, whereabouts. All expressed the belief that subjects were drowned in their escape attempt, but that subjects' mother is still clinging to the hope that her sons will be found alive. The relatives further advised that, in their opinion, subjects' mother would be greatly relieved if she were to find out, one way or the other, what has happened to her sons. All of the relatives contacted displayed a cooperative attitude and stated that, if only for the sake of subjects' mother, they would immediately notify the Tampa Division if anything came to their attention.

[REDACTED] and was assigned to Road Gang #36, Perry, Florida, sometime during 1952. He advised he had only been in this road gang for a period of one month or less when he and five other prisoners escaped. He stated one of the five other prisoners was CLARENCE ANGLIN. He advised that prior to his arrival at road gang #36, he had never met CLARENCE ANGLIN, did not associate with him at the road gang, and knew very little about him. He advised that they were waiting in a road "box" to be taken back to the road gang headquarters, when one of the six individuals discovered that the floor of the "box" was rotten and they could make an escape. He advised the escape was a spur of the moment affair, and all six individuals escaped. He stated CLARENCE ANGLIN, who, at the time he described as approximately 18 years of age, and two other individuals, [REDACTED] and [REDACTED] went in one direction, and that he, [REDACTED] and two other individuals, both of whom were older than ANGLIN and his two friends, went in another direction. He could not recall the names of the other two prisoners who accompanied him. He advised that the three of them traveled to Macon, Georgia, and split up. He advised he has not seen or heard from any of the above five individuals since that time, with the exception of receiving information that CLARENCE ANGLIN had been caught approximately one week after his escape.

advised that he could not explain why CLARENCE ANGLIN would have his name in his possession. He stated he did not think ANGLIN knew his name, and he stated it would be impossible for ANGLIN to determine his present whereabouts inasmuch as his residence was supposed to be Atlanta, Georgia, at the time the two of them were in Road Gang #36 at Perry, Florida. [REDACTED] advised he did not know FRANK LEE MORRIS or JOHN WILLIAM ANGLIN.

[REDACTED] stated he definitely would not harbor or assist any of the above individuals if contacted. He stated he would not call any law enforcement agency while any of the three were in his company, but promised that he would call the FBI immediately upon their departure if one of the above should contact him in any way.

## SUMMARY OF INVESTIGATION

At 7:15 AM, June 12, 1962, officers of the United States Penitentiary, Alcatraz, California, discovered that FRANK LEE MORRIS, JOHN WILLIAM ANGLIN and CLARENCE ANGLIN, all inmates, had escaped from their cells, leaving flesh-colored dummy faces in their beds. The escape route consisted of holes dug through the back of their cell walls near the ventilator area, climbing plumbing pipe in the utility corridor behind the cells to the top of the cell block, where they broke through the bars and ventilator lid onto the roof. They apparently climbed down from the roof by way of the bakery smokestack at the rear of the cell house, went over the chain-link fence and to the northeast shore of the island. Investigation indicated that the escape evidently occurred around 10:00 PM the preceding evening.

A similar hole was found in the cell of [redacted] as well as a flesh-colored dummy face. [redacted] told FBI Agents that Escapees had left him at about 9:37 PM on June 11, 1962, supposedly to return and finish hole in the rear of his cell, but he had not seen them since. Later that night [redacted] completed the hole in his cell, proceeded to the roof, and ascertained they had gone. He returned to his cell and went to bed.

[redacted] claimed that the Escapees had taken a six-foot by fourteen-foot raft made from rubberized raincoats of inmates and three yolk life preservers similarly made. These articles had been made and stored on top of the cell block immediately under the cell house roof, and Escapees had worked on same in the evening after breaking out of their cells. They planned to escape to Angel Island in San Francisco Bay and then to the mainland, where they would commit burglary to obtain guns and clothing, steal a car, and leave the area.

Searches of the cells of Escapees and [REDACTED] uncovered hacksaw-type blades, spoon handles with sharpened edges, four flesh-colored dummy faces, "Popular Mechanics" and "Sports Illustrated" magazines containing photographs and description as to making rubberized rafts and lifesaving-type vests, paint, paste, tape and twine between cells evidently used as a signal device.

A search of the area on top of the cell block indicated that same was used as a workshop by the Escapees. A life preserver made from olive drab rubberized material cut from inmates' raincoats, a partially completed raft of similar material, electric drills fashioned through use of a motor from the prison vacuum cleaner and one through use of a motor obtained from barber clippers, liquid plastic, a homemade periscope, and miscellaneous items were located there. A homemade wooden paddle and about 100 feet of heavy black extension cord were located on the cell house roof, and a similar type cord was located on the beach.

On June 12, 1962, a wooden paddle was picked up near Angel Island in San Francisco Bay, and on June 15, 1962, a homemade life preserver was observed to wash ashore on Fort Cronkhite Beach, which is on the ocean side of Golden Gate Bridge. On June 22, 1962, another homemade life preserver was picked up in San Francisco Bay some 50 yards east of Alcatraz. All of these items were similar in appearance and material to those recovered at the prison. On June 14, 1962, a waterproof package, apparently made of inmate raincoat material and containing names, addresses, photographs and personal property identifiable with the ANGLIN brothers was picked up in San Francisco Bay between Angel Island and Alcatraz.

On June 19, 1962, inmate [REDACTED] advised FBI Agents that he and inmate [REDACTED] were initially involved in the escape plot. [REDACTED] claimed that he quit same after digging a few holes in his cell wall and then plugged them up. He said that [REDACTED] dug several holes in his cell wall but stopped along with Escapees to avoid detection while plumbing was being installed in the cell block, and [REDACTED] was not told by Escapees to start digging again as they had done. Eight holes were uncovered in a check of [REDACTED] cell and some 36 holes were uncovered in checking [REDACTED] cell, all of which had been carefully camouflaged.

██████████ stated that ██████████ and ██████████  
██████████ both inmates, acted as ██████████ lookout for  
about one week each and then quit. He said that JOHN ANGLIN  
in February 1962 showed him two files which ANGLIN claimed  
he had obtained from an inmate, ██████████  
██████████ and ██████████ denied any knowledge or participation in  
the escape. b7c  
b7D

An authorized complaint was filed on June 13, 1962,  
before the United States Commissioner at San Francisco charging  
Escapeses MORRIS and the ANGLIN brothers with violation of  
Title 18, Section 751, U. S. Code. Federal warrants were  
issued for their arrest and a bond recommended in the amount  
of \$50,000.00 each. On June 20, 1962, United States Attorney  
CECIL F. POOLE, San Francisco, advised that he would consider  
prosecutive action at the proper time as to ██████████ and  
██████████. b7c

Liaison maintained with police agencies, searches,  
neighborhood investigation, and various inquiries in the San  
Francisco Bay area have developed no information indicating  
that Escapeses arrived on the mainland. Authorities indicated  
that the bodies of Escapeses were possibly carried out to sea  
by the outgoing tide which was existent during the pertinent  
period and recovery of same remote. Interviews of relatives  
of Escapeses, prison inmates, former inmates, associates and  
acquaintances of Escapeses have developed no information  
indicating Escapeses had contacted them.

██████████ subsequently advised that the six-foot  
by fourteen-foot raft allegedly made from inmate raincoats  
was assembled in one of the cells of Escapeses. He claimed  
that it was never tested to ascertain if it were seaworthy  
and says that only Escapeses and ██████████ involved in the escape  
plan. b7c  
b7D

The FBI Laboratory advised that the life preservers  
recovered from B Cell Block, on Fort Cronkhite Beach, and  
from San Francisco Bay; the partially completed pontoon recovered  
from B Cell Block; and the Alcatraz raincoat are all composed  
of the same type material. The Laboratory inflated the life  
preservers and placed weights on them. The life preserver  
recovered from B Cell Block was discovered to be completely  
air tight, remaining firm for several hours. The other two  
life preservers lost most of their air in about an hour by  
slow rate of deflation, but pressure could be maintained by  
mouth.

b7C  
SF 76-2887

The hair on the dummy faces recovered from the cells of the Escapees and [redacted] was of human origin. Three dummy faces recovered from cells were determined to be composed variously of portland cement, sand and white cement paint, with coloring by flesh-colored paint. The dummy face recovered from the cell of CLARENCE ANGLIN was formed from soap packed over a bundle of white cotton rags and painted with flesh-colored paint. b7C

Subject [redacted] subsequently advised a prison official that a prison guard referred to as [redacted] (identified by prison officials as [redacted]) discovered MORRIS making the dummy face in March 1962 and was persuaded by MORRIS to accept \$100.00 and to receive \$400.00 more from a convict friend. [redacted] was promised \$2,000.00 to have car, clothes, guns, money, and [redacted] former inmate associate of JOHN ANGLIN at Lewisburg Federal Penitentiary, from Oklahoma City waiting on the shore close to Sausalito, California. [redacted] allegedly smuggled letters out for Escapees. [redacted] indicated that an electric hand drill and 200 pounds of cement were innocently furnished Escapees by [redacted] at Alcatraz. b7C IALIF

Upon contact by Bureau Agents, [redacted] refused to discuss this matter further or in fact to discuss the matter with anyone. [redacted] subsequently volunteered that he never had any intention of escaping from Alcatraz but merely participated so that he might air his difficulties in court. b7C

Warden OLIN G. BLACKWELL, U. S. Penitentiary, Alcatraz, believed that Subject [redacted] initially furnished correct information as to the escape and the participants. Subsequently, [redacted] who was in a segregated cell block, became a disciplinary problem and exhibited psychotic tendencies. He believed that [redacted] furnished additional information as to the alleged help given Escapees by prison employees in the belief that this would obtain him a transfer from Alcatraz. BLACKWELL believed that this additional information was merely the figment of [redacted] imagination and when same did not obtain [redacted] a transfer, he refused to discuss it further. [redacted] at Alcatraz, and [redacted] at Alcatraz, advised Bureau Agents that they had not assisted Escapees in any manner. b7C b7D

b7c  
SF 76-2887

[REDACTED] b7c  
former inmate acquaintance of JOHN ARGLIN at the U. S. Penitentiary, Lewisburg, Pennsylvania, and alleged by [REDACTED] to be the outside participant in the escape, was determined to have been in Oklahoma City during the pertinent period. [REDACTED] and other sources at Oklahoma City indicated that [REDACTED] had no knowledge of the whereabouts of the Escapees and had had no contact with them.

The [REDACTED] and a [REDACTED] of the SS "Norefjell", b7c b7d  
a Norwegian ship, on July 17, 1962, saw a body floating in the Pacific Ocean some 20 miles northwest of the Golden Gate Bridge of San Francisco. This body was floating face downward with hands and feet dangling down into the water. The body was clothed in dirty white-appearing full-length trousers. Upon viewing portions of trousers similar to that worn by the Escapees, they advised that the body they saw floating could have had prison garb trousers on it; however, they did not make a close enough inspection to arrive at such a determination. They said they did not report sighting the body until a later date since they were not in radio communication with the United States facilities and they were en route to a foreign country.

Records of the United States Coast Guard, San Francisco, and [REDACTED] which concern b7d  
drownings in the San Francisco Bay area and suicides from the Golden Gate Bridge, contained no missing body clothed in white-appearing trousers other than Escapees during the pertinent period.

[REDACTED] former inmate at Alcatraz and presently incarcerated at the United States Penitentiary, Leavenworth, Kansas, advised that he had no information relative to the escapees and he had not participated in the escape. At various times articles, including dead bodies, craniums, jawbones, etc., washed ashore in the San Francisco Bay area, but none of these have been identified with the Escapees. b7c b7d

On March 21, 1963, the last of the inmates incarcerated at the United States Penitentiary, Alcatraz, California, were transferred to various institutions

b7c  
SF 76-2887

throughout the United States in keeping with the "phasing out" of Alcatraz. Just prior thereto, Subject [redacted] was transferred to the United States Penitentiary, McNeil Island, Washington; Subject [redacted] to the United States Penitentiary, Leavenworth, Kansas; and Subject [redacted] to the United States Penitentiary, Atlanta, Georgia. b7c

Exhaustive investigation has failed to uncover any scintilla of evidence indicating that Escapees ever reached the mainland from Alcatraz. The only possible evidence as to their whereabouts located is the sighting of a body floating in the Pacific Ocean northwest of the Golden Gate Bridge and which was attired in clothing similar to that worn by the Escapees. Also in this regard, there was no other individual missing from the San Francisco Bay area during the pertinent period who was so attired.

EVALUATION OF PROSECUTIVE  
ACTION RELATIVE TO SUBJECTS

With respect to prosecution as to the Escapees, same has already been initiated with the filing of a complaint on June 13, 1962 and if they should be located the U. S. Attorney has indicated that prosecution will follow. In this regard, to prove their offense one needs only to prove that they were located at a place other than the U. S. Penitentiary, Alcatraz, California. It is also noted that guards are available to testify that holes had been knocked into the ventilator areas of their cells and that they were not present.

With respect to prosecution as to [redacted] and [redacted] b7c it is noted that there were holes located in the cells of these two individuals, which had been carefully camouflaged. It was not possible through Laboratory examination to determine when these holes had been drilled or when they had been camouflaged. Neither of these individuals had done sufficient work in their cells at any time to allow them to leave same.

[redacted] was located in his cell by the prison officers. It is noted that he had completed digging in the vicinity of the ventilator area in his cell and he could have left his cell and proceeded to the roof as did the Escapees. In this regard he admits that he went to the b7c

b7c  
SF 76-2887

roof of the prison but found that they had left. He claimed that he had just participated in the escape attempt so that he could bring his personal problems to the attention of the court and that he never intended to leave the penitentiary. The former warden at Alcatraz, OLIN G. BLACKWELL, advised on several occasions previously and prior to the closing of Alcatraz that Subjects [redacted] and [redacted] had both exhibited psychotic tendencies which had caused their isolated confinement on several occasions. In view of the closing of Alcatraz, it is highly improbable that prosecutive action will be taken relative to those individuals who did not escape. b7c

PHYSICAL EVIDENCE FOR  
PROSECUTION OF SUBJECTS b7c

Report of SA [redacted] dated at San Francisco August 20, 1962, pages 8 through 17 contains descriptive data relative to the physical evidence obtained in this matter. In addition, the Bureau pamphlet "Nationwide Criminal Activities", dated August 16, 1962, entitled The Alcatraz Escape carries additional descriptive data and pictures relative to this escape, which has been described as one of the most ingenious escapes ever attempted from a penitentiary. The Bureau has been furnished with a great number of photographs depicting much of the material recovered. Physical evidence has been stored with the U. S. Marshal at San Francisco. b7c

SUGGESTION FOR PREPARATION OF BUREAU  
EXHIBIT RE ALCATRAZ ESCAPE

It is proposed that consideration be given to obtaining the physical evidence in this matter and that same be prepared by the Bureau for exhibit purposes in Washington, D. C.

It is realized that in Bureau cases wherein final prosecutive action has not occurred, that the evidence is always maintained in a secure position away from the public eye and the press. This is a unique type case wherein there would be tremendous national interest exhibited by the movie industry, television and radio industry, the press, as well as the American public, who would be afforded the opportunity to see the exhibit. This exhibit could be so prepared and encased with glass or other protective coverings that the material would still be of evidentiary value.

b7c  
[REDACTED]  
SF 76-2887

In addition, if such an exhibit were made it would keep before the public eye the status of these individuals and would be of tremendous assistance in their location if they had been successful in ever reaching the mainland from Alcatraz.

It is realized that in most every case which the Bureau handles, it is not possible to make available through public media evidence or background of a matter since to do so might jeopardize prosecution. In this particular case it is believed that prosecution of the Escapes could be had successfully without the physical evidence relative to their escape since their mere absence from the institution is sufficient for prosecution. Since it is necessary in so many matters to make little comment to the press and public media, or in fact to make no comment, it is felt that this would convey to them the distinct impression that we are willing to furnish them with material of interest if it is possible within the framework of our investigative responsibilities.

The above suggestion is being furnished with the Bureau's interests at heart since it is felt that the preparation and display of such an exhibit would greatly enhance the Bureau's stature as well as be of possible investigative assistance in this matter.

Should the Bureau decide that action in this manner should be considered, then approval of such a plan would have to be obtained by the San Francisco Office from the U. S. Attorney at San Francisco and then through subsequent contact by the Bureau with the Department of Justice. It is believed that this could be accomplished if determined to be in the best interests of the Bureau.

SUBJECTS AT LARGE ARE CONVICTED BANK ROBBERS AND SHOULD BE CONSIDERED EXTREMELY DANGEROUS.

ADDENDUM OF SPECIAL INVESTIGATIVE DIVISION

10-24-63

b7c

The SAC, San Francisco has recommended that a suitable exhibit be prepared for the tour route at the Bureau concerning the escape of three inmates from the United States Penitentiary, Alcatraz, California, on 6-12-62. No trace has been found of the escapees, and active fugitive investigations are still in progress. Special Investigative Division, therefore, feels that an exhibit such as this should not be prepared at this time. It is recommended, therefore, that this be routed to the Crime Records Division for their comments.

Reurist 10/15/63.

It is not believed appropriate that a tour exhibit based on the captioned case be prepared at this time.

NOTE: This case concerns the escape from USP, Alcatraz by three inmates on 6/12/62. San Francisco suggests preparation of tour exhibit consisting of physical evidence since establishment of mere absence from institution is sufficient for prosecution, and suggests exhibit might be of possible investigative assistance. No trace has been found of the escapee and active fugitive investigations are still in progress. Special Investigative Division is opposed to such an exhibit at this time and the Crime Records Division concurs.
